Is it allowed to make copies of the program?

Requisitos e Condições · https://cortecerto.com/en/docs/esta-permitido-hacer-copias-del-programa/

Prohibiting the use of the same license on more than one computer does not prevent the user from saving the program's installation files somewhere safe, in case of future need. What he cannot do, of course, is pass on this copy to third parties.

If there is a need to use the program on more than one computer by the same customer, additional copies must be purchased, with a reduced price according to the number of copies.
